SUPPLEMENT TO  
REPORT NO.

1. The firm of Lorenzo Sartorio, 48 Via Lima, Rome, has presented the Attas and Milone firm, 1 Via Toscana, Rome, with an offer of 560 tons of aluminum originating from Canada, carrying the trade name, Linea Rossa (sic). It is of 99.98 per cent purity, in ingot and loaf form, with maximum weight per unit of 34 kilograms. The price is set at \$550, FOB Genoa. The merchandise is allegedly in the course of shipment to Europe.
2. Sartorio has reportedly informed the Attas and Milone firm that the aluminum was originally destined for Czechoslovakia. However, since the ship puts in at Genoa, Sartorio fears that difficulties will arise in obtaining an export license for Czechoslovakia, even though the merchandise has a transit status. Sartorio therefore asked Attas' advice as to the possibility of having the aluminum transhipped to another port after being unloaded in Genoa, for forwarding to its original destination.
3. Since Attas does not know Sartorio well, he made no commitment, and the handling of the affair has not yet been decided.
